WHISTLER blackcombe lodge

- [12] **Computer Literacy
for the CE Administrator** Stephen Ibaraki Hillcrest B
*Doug Smith

Through the use of parallels to human anatomy, understand and/or update your knowledge of this ever-evolving technology. Materials and discussion will cover hardware trends, developments and terminology.

Stephen is a teacher (BCIT, Capilano College), writer ("BC Business", among others), a consultant to the Canadian Office Products Association, a systems analyst and is on retainer with the Atomic Energy Commission. His firm is Cepelle Computer Consultants.

10:30 Break

- 10:45 [13] **OLA, New Futures** Dick Scales Hillcrest A
*Craig Andrews

Bill 58 is proclaimed: OLI dissolves and the Open Learning Agency appears as the umbrella organization for Open College (ABE, Technical Vocational), Open University (Bachelor, Graduate Level credit), and Knowledge Network (General Education and Telecommunications Network). Other components are in the works, and the Agency's purposes will widen. This presentation will update you on one of B.C.'s most innovative "distance" education delivery systems.

Dick is Principal of Open College.

- [14] **Adult Literacy
and the MacIntosh** Barry Underwood McGuire B
*Don Jacob

Here's an opportunity to see the latest adult literacy and other educational software available for the Apple MacIntosh, including "Course of Action." Explore and discuss the general issue of "computer assisted instruction (CAI)." Is it really what we need? Is there a perfect package out there? Catch a video glimpse of the future as Apple Corporation speculates where Mac will be in the year 2000.

Barry is an Educational Consultant with Apple Canada after 19 years as a teacher. He installed the first Apple II in a Canadian classroom, and is Founding President of the Computer Using Educators of B.C. (CUE BC). His academic credits include a BSc. (Univ. of Winnipeg), a BEd. (Univ. of Manitoba), and an M.A. (U.B.C.).

- [15] **Job Futures -
Trends to Consider in
the Labor Market** B. Barnes McGuire A
*Bob Chadwick

This presentation will review trend data related to population demographics, structural changes in the labour market, and the new job/technology relationships we can expect. We'll gain insight into the rapidly unfolding human graphic from data provided by the Economic Council of Canada, U.S. Department of Labour, Canada Employment, and research done by the Institute for Finance and Government (Stanford). Implications for adult educators will be considered.

Bruce is President of the Co-operative Career Work Education Association of Canada and a PhD. student at UBC ("School-to-Work transition and Vocational Assessment"). He is the founder and Head Teacher of the "Work and Learn" Program for the Surrey School District.

- [16] **Courses to Plan For
The Electronic Future** Steven Ibaraki Hillcrest B
*Doug Smith

Having understood the nature of a new technology, educational planners should next anticipate its impact, especially the area known as "integrated office system". Discussion includes the realm of software packages, their future and how it all relates to educational strategic planning.

Stephen's background is outlined in Session [12]
