

[Interview] Part 7: Barb Bowman - Best IT Resources

This is the next blog in the **continuing series** of interviews with leading professionals. In this series of blogs, I have an exclusive interview with Barb Bowman. Barb is an internationally acknowledged home networking and device authority; Microsoft Most Valuable Professional (MVP) - Windows Networking and Windows XP Media Center.

Enjoy!

Stephen Ibaraki, **FCIPS, I.S.P., MVP**

Stephen: Which are your top recommended resources?

Barb: Not in any order, but:

1. If you're looking for unbiased commentary and advice and had to pick a blog to read, George Ou is even handed and understands the WiFi arena perfectly - <http://blogs.zdnet.com/Ou/>

2. Current info for non-engineers on what's happening with 802.11/WiFi - <http://www.wi-fiplanet.com/>

3. CERT's Home Network Center - http://www.cert.org/tech_tips/home_networks.html

4. Joe Davie's Cable Guy articles - <http://www.microsoft.com/technet/community/columns/cableguy/about.mspx>

5. Home Networking Product Reviews - <http://www.practicallynetworked.com/>

Look for more with Barb in the next blog.

I encourage you to share your thoughts here on these interviews or send me an e-mail at sibaraki@cips.ca.
