Solving the Pain around migrating Visual Studio 2003 Web Projects to Visual Studio 2005

I know you want to make migrating Visual Studio 2003 Web projects to Visual Studio 2005 as painless as possible.

I feel models save a lot of time. Take a look at these two web sites.

"There's a preview <http://webproject.scottqu.com/Download.aspx> of the Visual Studio 2005 Web Application Project <http://weblogs.asp.net/scottqu/archive/2005/12/07/432630.aspx>. This new project model is an add-in to VS 2005 that provides the same conceptual project model that existed in Visual Studio 2003 but with all the new designer features of Visual Studio 2005 and ASP.NET 2.0."

Have fun!
