Secrets in Managing a Mixed Environment

You and I know that this is a reality for many businesses. What is this? Working in a mixed environment. I found this paper to be a good overview resource for IT managers.

In late November and mid-December, Quest worked with Microsoft to deliver a Webcast about SMS and MOM and how customers can leverage Vintela Management Extensions (VMX) to manage their entire enterprise, including Windows, Unix, Linux and Macintosh resources.

For more information, read Jackson Shaw's latest paper on security and management at: <http://wm.quest.com/landing/?id=171>

Thank you,

Hi Tony,

It's good to hear from you. The link you provided is a good one however the webcast reference is not available. If you get past the sign-up screens, you can download the paper referenced.

Feel free to comment here or contact me via instant messaging at sibaraki@hotmail.com or sibaraki@cips.ca. I look forward to engaging with you further.

Thank you,
Stephen Ibaraki
