

Life Lessons from Randy Pausch

Randy Pausch, as a Carnegie Mellon University professor, developed the programming language called "Alice" (<http://www.alice.org/>) and is a past recipient of Microsoft Research funding on Game Development.

As a longtime educator, I found this lecture from Randy particularly compelling. It contains so many life lessons that will inspire and move you: <mms://wms.andrew.cmu.edu/001/pausch.wmv>

Randy talks about: "Brick walls are there for a reason. They let us prove how badly we want things."

Best regards,

I'm so glad to have seen this lecture in its entirety, Stephen. Thank you. I saw an excerpt sent to me on Facebook, but the whole is greater than the sum of the parts. And that's no head fake...

Don, I appreciate the comment. And you are so right about the whole lecture since it provides the underlying context, history, relationships, and more -- this gives the lecture a special vibrancy.

Best regards,

Stephen

How could you fail to be truly inspired by this man. He is one of those very few people who come along once in a lifetime. I can only hope that the fortunate people that he helped and taught fully appreciate the unique experience that they had and do justice to his legacy.
