WHAT IS IT ?

Recognizing development that's ground-breaking. Forward-thinking. Community-building.

The MSDN Code Awards is your opportunity to tell us who you think is the best developer or development team in Canada.

Who's driving business performance by delivering the "impossible"? Who has created the most innovative application? Who has used their development skills to help out in their local school, public library or charity? Who's really on coding's cutting edge?

You can nominate an individual developer you admire, a team of great developers, a team you've worked on ... or you can even nominate yourself.

Let us know who you think most deserves to be recognized for their technological excellence, outstanding contributions to the community, business savvy, or all-round passion for the art of development.

Those who live by the code, win by the code.

Contact [MSDN CANADA](#) if you have questions about the awards program.

SUBMIT YOUR NOMINATION NOW.
